

Announcement:

Conco Systems is pleased to announce it is now the Australian and New Zealand agent for Beaudrey. This enhances our one stop shop solution for not only condensers and heat exchangers but your entire cooling water system equipment.

Introducing:

Since 1912, Beaudrey has specialised in the engineering, manufacturing and installation of fully customisable water screening and condenser protection equipment.

Beaudrey stop gates, trash rakes, traveling band screens, drum screens, microstrainers, pressure-line strainers, debris filters and continuous condenser tube cleaning systems have been supplied to over 80 countries worldwide. Designed to minimise operational costs, maintenance needs and environmental impact, Beaudrey offers a complete range of high quality, efficient and economical solutions for all water screening equipment needs.

Beaudrey products are found in fossil and nuclear power plants, chemical plants, oil and gas facilities, LNG terminals, and desalination, irrigation, and water treatment plants.

Contact:

Call **Stephen Butcher** for more information on **0427 305 597** for not only all your cleaning, testing and repairing of Heat Exchangers but also now Debris Filters ,Screens, trash rakes and Zero Loss Ball Cleaning Systems.

Total Performance™
For Condensers & Heat Exchangers
