

For Immediate Release:

Industry Leaders Collaborate to Sponsor 2016 Condenser Life Cycle Seminar

San Francisco, CA (July 14, 2016) Conco Services Corporation, NALCO Water, Plastocor and RetubeCo, all leaders in the field of condenser technology, will be hosting the **2016 Condenser Life Cycle Seminar (CLCS)** in San Francisco, California from September 7-9, 2016 at the Sheraton Fisherman's Wharf. The Seminar is a technical forum educating power plant managers, engineers, and technical personnel. The seminar will include leading edge best practices to apply throughout the life cycle of a condenser to maintain peak operating efficiency and to prolong unit life. Given the technical complexity and financial impact of a surface condenser on plant operations, the Seminar will be advantageous for both technical and management personnel. Attendees can earn Continuing Education Credits and registration to the Seminar can be completed online at: www.condenserseminar.com

The 2016 CLCS invites attendees back to school for **Condenser University**, an intensive agenda of comprehensive condenser technology. Attendees will have unfettered access to technical experts across a wide range of condenser-related fields who will engage and provide real-world solutions to some of the toughest operational problems. Some of the content in CLCS's **Condenser University** will include *Fundamentals of Condenser Design, Condenser Performance Monitoring, Establishing Key Performance Goals, Instrumentation 101, Condenser Shell Side Repair, Developing a Retubing Specification, Coatings for Remediation and Life Extension, Leak Detection Basics, Tube Fouling and Cleaning, and Cooling Water Chemistry.*

Sponsor Information: Conco Services Corporation enables power plants, refineries and industrial production facilities to improve profitability, productivity and reliability through an integrated platform of products and services for condensers and heat exchangers. **NALCO Water**, an Ecolab company, is a trusted partner at more than one million customer locations, and is the global leader in water hygiene and energy technologies and services that protect people and vital resources. **Plastocor, Inc.** specializes in the turnkey field application of protective coatings to main surface condenser and BOP heat exchangers. **RetubeCo** provides the global power generation industry with high quality, cost-effective retubing and repairs to steam condensers and balance of plant heat exchangers.
