

For Immediate Release:

Conco Services Corporation Completes Merger

Pittsburgh, PA (January 27, 2015) Edward Saxon, Chief Executive Officer of Conco Services Corporation is pleased to announce that Conco Systems, Inc., Conco Services Corporation, and Conco Industrial Services Corp. have merged into a single corporation keeping the name of Conco Services Corporation.

Saxon said, "By merging these three businesses into a single entity, Conco expects to be able to have a larger, more flexible integrated field service organization that is able to supply our customers' tube cleaning and testing needs more promptly, completely, and confidently. Consolidating back office operations and streamlining processes should reduce the complexity of our transactions and speed communications across our markets, managers, and locations. Technology transfer between power and industrial markets has progressed nicely and our enhanced ability to match our tool box of technologies to custom applications has given us the confidence to move forward with great expectations of enhanced ability to more rapidly penetrate and expand further into both power and industrial heat exchanger service markets. All personnel and contact information will remain as it was prior to the merger, and I assure you that Conco Services Corporation will continue to provide 'Absolutely the best' tube cleaning and testing products and services to our customers around the world!"

Founded in 1923, Conco Services Corporation is the world's leading provider of condenser and heat exchanger services with offices located in the United States, Europe, and Asia Pacific. It's the only company utilizing the TruFit™ Tube Cleaning System; an exclusive technology that incorporates mechanical tube cleaners sized exactly to the internal diameter of the tube. Using safe, low pressure water (300 psi), the TruFit™ tube cleaners are "shot" through the tubes leaving an exceptionally clean, ideal surface for improved heat transfer. To see Conco TruFit™ technology in action, watch this video: <http://www.concosystems.com/media/videos/trufit-tube-cleaner-video>. Additional exclusive Conco Technologies include Conco HydroDrills™, Excaliber™ and Mitee Mouse™ Systems, NitroLance™ Tube and Surface Cleaning System, TubeBridges™, FinTech™, Alkasert™, and various plugging systems. Conco Non-Destructive

Testing services include: Eddy Current for non-ferrous materials, Remote Field for Ferrous materials, and both Helium and Sulfur Hexafluoride tracer gas leak detection services. For more information about Conco Services Corporation, please visit: <http://www.concosystems.com>.
