**GLOBAL HEAT EXCHANGER CHANGES NAME TO
CONCO INDUSTRIAL SERVICES CORPORATION**

New Name, Same Commitment to Innovative Heat Exchanger Services

PITTSBURGH — February 18, 2009 — Conco Systems, Inc. announced today that the company shareholders and board of directors approved a name change of wholly owned Global Heat Exchanger, Inc. to Conco Industrial Services Corporation effective immediately. The name Global Heat Exchanger has been used since 1970, achieving widespread penetration in the US, Canada, Europe, Australia, Middle East and Asia. The company is widely recognized as the innovator of the HydroDrill brand of tube cleaning systems and services, currently being used to clean challenging tube deposits at refineries, petrochemical plants, pulp and paper, electric power and process industry.

The name change reinforces the Conco brand as an integrated provider of heat exchanger tube cleaning and testing services and reflects the company's long-term strategy to advance its service capabilities, and more closely aligns and strengthens the identity of each of its operating divisions; Conco Systems, Inc., Conco Services Corp., and Conco Industrial Services Corp.

In addition to a new name, Conco Industrial Services adds new cleaning capabilities with the introduction of its exclusive liquid nitrogen cleaning service called NitroLance. The NitroLance focuses on in-place cleaning of fouled heat exchanger tubes using zero-waste, clean liquid nitrogen.
