## **Conco Systems Releases New Catalogs**

*Conco Systems Releases Three New Market-Focused Catalogs*

**Verona, PA** (March 3, 2014) Conco Systems is releasing three new comprehensive market-focused catalogs highlighting its products and services. The new catalogs are for distribution in the power, industrial and international markets, and each provides a single source of all the products and services Conco has to offer in each market.

The new catalogs highlight the core competencies of Conco's cleaning, leak detection and eddy current testing but differ from previous versions in that they go into greater detail and incorporate the complete portfolio of Conco's products and services. These are the first catalogs that Conco has produced in three years, and they include customer testimonials, case information and product detail. Essentially, there is enough information provided in the catalogs to help customers determine the products or services that are applicable to their specific situations.

"Our catalogs highlight our unique and exclusive technologies for cleaning, testing and leak detection services for power, industrial and international customers," says George E. Saxon Jr., President of International Markets. "The catalogs also highlight the benefits that can be achieved from using the Conco technologies including increased megawatt output, reduction in CO<sub>2</sub> emissions and optimum condenser performance."

The inside cover of each new catalog features a unique gatefold containing an infographic that visually represents Conco's products and services and identifies how Conco provides solutions to achieve total performance. Whether it's in power generation, where we strike the balance between efficiency and reliability of the condenser and heat exchanger or in the industrial markets where we focus primarily on the speed, safety and small footprint of our equipment, Conco offers a complete solution.

Conco's products are available through our international distributors, whose contact information can be found on the back cover of each catalog.

Requests for catalogs can be made via telephone at 1-800-345-3476 or by emailing [info@concosystems.com](mailto:info@concosystems.com).

Founded in 1923, Conco is the world's leading provider of condenser and heat exchanger services to the power generation and industrial process industries with offices located in the US, Europe and Asia Pacific.
